

BRIO WIL

CONTROL YOUR
PROJECTORS BY VOICE

INTUITIVE LED CONTROLLER

Why bother controlling your projectors with a remote control when you already have your voice? With the BRiO WIL, choose a colour, control the brightness or select a light sequence with your voice via the trendy voice assistant Alexa.

SMARTPHONE APPLICATION

The controller can also be controlled via a dedicated smartphone application, Wifi (connected to your local network) or Bluetooth®.

WARM WHITE

You don't know what to choose between white and multicolour? With BRiO WIL you have the solution! The controller enables the CCEI multicolour projectors to be switched on in 12 fixed colours, including 2 shades of white: cool white (slightly bluish) and warm white (warm atmosphere).

CONTROL THE POOL BY VOICE!

By connecting your BRiO Wil to Alexa, control your pool lighting directly by asking Alexa.

Choice of color, brightness level, shut-off timer - the possibilities offered by Alexa are endless!

alex lights on pool in purple

INTUITIVE SMARTPHONE APPLICATION

BRiO Wil is also an intuitive application that lets you quickly select the color or light sequence of your choice!

Available on iOS and Play Store, the app is controlled by Wifi or Bluetooth connection, whichever is more accessible!
